

Hydair Drives - Coming to Karratha

Hydair Drives are going to be exhibiting at this year's Expo in Karratha. Assisting us on the stand will be representatives from **OEM Dynamics** and **Eaton Fluid Power**.

You can visit us on **Stand 34**.

Technical Talk

Hose Restraints and Cable Stockings - Health and Safety

For anyone involved in the drilling industry in Australia, the word "Whip Check" or "Hose Stocking" will be familiar to them. Used in high temperature and high pressure air applications, which are prone to failure due to their arduous applications, "Whip Checks" are literally life savers.

Fabricated from steel braided wire in sizes to suit the hose OD, they restrict the hose from whipping in the event of a failure and/or rupture, preventing damage to the operator who is generally in close proximity to the application. Hydair Drives manufacture and supply assemblies and hose kits.

The hose stockings are available in a variety of styles and sizes to suit all uses, whether large or small and are fitted with 2 and 4 locating lugs.

"By covering the hose with one of our stockings, serious injury can be prevented"

Sales Pitch

Tecsis S4250 Pressure Switch

Convert pneumatic or hydraulic pressure into an electrical switching output with the new S4250 Mechanical Pressure Switch from Tecsis. The switch has membrane sensing element (up to 16 bar), or piston sensing element (up to 320 bar), with one switched output as a change-over contact (SPDT).

An adjustment screw allows the set point to be easily adjusted by an allen key (supplied). The S4250 switch also has an adjustable hysteresis, which is the difference between the switch point, and the reset point.

The S4250 is extremely compact, and comes standard with 1/4" BSP thread, and IP65 DIN Plug. Suitable for Pneumatics, Hydraulics, Mechanical Engineering, Plant Construction, Auto Electrical, etc...

The switch with membrane is suitable for media such as compressed air, non-aggressive liquids or self-lubricating fluids. The piston version is as standard for self-lubricating fluids, other media on request. It is available as standard with a 1/4" thread galvanized steel process connection. Other threads and materials, including brass and stainless steel are optionally available. The switch can be installed in any desired mounting position.

Staff News

Hydair Drives welcomes 2 new staff members to our team

Accounts

Following many years of dedicated service as our accounts person, Angelina Gao is leaving to take on a new business challenge and we wish her well.

Michelle Schrader has replaced Angelina.

Internal Sales

We also welcome on board Roy Sansom who has taken up the role of internal sales.

He can be contacted through the main switch line 9475 5777 or general sales enquiries to info@hydairdrives.com.au

Baby News

Congratulations to Renae on the birth of her baby daughter Chelsea Louise.

Mobile Service Kalgoorlie

Drinks on wheels

SEEMS they do things a little differently when it comes to a drinks break in the Kalgoorlie-Boulder Cricket Association.

Our hard-working photographer took this snap of North Kalgoorlie Roar's Mitch Graham heading out to the middle with the esky on Sunday.

It appears the motorised ride-on esky also comes with a trailer, designed to carry extra supplies for thirsty players.

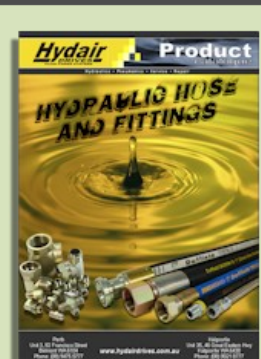

Hard at play: Roar's Mitch Graham shows off his skills on the team's motorised esky. Photo: KELLIE LEWIS

When Mitch joined us to ramp up our mobile hose and fitting service in Kalgoorlie, we didn't expect him to take the job to a whole other level ! No job too big or small!

Hose and Fittings Catalogue

Hydair Drives catalogue.

Our new adaptor catalogue is now available for distribution, supported by extensive stock holdings of adaptors and special fittings in Belmont and Kalgoorlie. You can also download from our web site www.hydairdrives.com.au
